Analyzing Indian Agricultural crop production (1997 to 2022) According to The World Bank, India is a global agricultural powerhouse. It is the world's largest producer of milk, pulses, and spices, and has the world's largest cattle herd (buffaloes), as well as the largest area under wheat, rice and cotton. It is the second largest producer of rice, wheat, cotton, sugarcane, farmed fish, sheep & goat meat, fruit, vegetables and tea.

What is the agricultural production data for 2021? As per 2ndAdvance Estimates for 2021-22, total Foodgrains production in the country is estimated at record 316.06 million tonnes which is higher by 5.32 million tonnes than the production of foodgrain during 2020-21.

What is the agricultural productivity in India 2021? India's foodgrains production touched a record 315.7 million tonnes in 2021-22 despite climate change challenges says the Economic Survey 2022-23 tabled in the Parliament by the Union Minister of Finance and Corporate Affairs Smt.31 [] ., 2023n

> Which crop has highest production in India 2021? Rice totalling 130.29 million tonnes, higher by 13.85 million tonnes than the last five years' average production of 116.44 million tonnes. Wheat 106.84 million tonnes, higher by 2.96 million tonnes than the last five years' average wheat production of 103.88 million tonnes.

Agricultural growth has been fairly volatile over the past decade, ranging from 5.8% in 2005-06 to 0.4% in 2009-10 and -0.2% in 2014-15.

Such a variance in agricultural growth has an impact on farm incomes as well as farmers' ability to take credit for investing in their land holdings.

India's Agricultural Crop Production Analysis(1997-2021)
